The client is a medium sized company active in the metal industry. Through a wide range of machinery and a spacious workshop with skilled employees, the client is active over a wide range in the metal sector. They have their own engineering department. Important: complete doors and windows frames, lorries, hydraulic trolleys, tanks, a wide range of custom made constructions, stairs, etc.

Tasks
- Increase efficiency
- Quality improvement
- Project innovation
- Workshop safety
- Personal safety
- Improvement of the market position

Results
For the client the time has come to start investing and reorganizing for the next level, which means investing in a considerable expansion of the workshop, new office, expansion of the machine park and a redesign of the factory site.

The expert analysed the current states of affairs during the first week of his stay and supervised the improvement process during the entire period, made plans and gave practical advice for the coming 6 months. The company started already the improvements and expansions with an enormous drive and energy.
